FG150	150MM	9.19M2	24
FG200	200MM	5.93M2	24

Earthwool is the new mineral wool brand from Knauf Insulation, adding the benefits of ECOSE Technology to create a new kind of mineral wool insulation that is naturally brown.

It offers significant improvements in terms of feel, handling and environmental performance while still delivering the outstanding performance you expect from traditional mineral wool.

Earthwool has unified Knauf Insulation's core glass and rock mineral wool range under a single name, replacing the Crown and Rocksilk brands. This single identity helps to create the most comprehensive range of mineral wool products and makes the task of finding the best solution a simple one – the answer is now always Earthwool.

- A+ Generic BRE Green Guide rating*
- Made using recycled materials
- [Made with ECOSE Technology](#)
- Made from rapidly renewable organic materials
- Formaldehyde-free binding process
- No added dyes
- Up to 70% less embodied energy
- Up to density 60 Kg/m³ – rock mineral wool
